Work Experience

Wordpress / Full-stack Developer - Freelance

July 2024 – Present

Remote (US, Canada)

- Created websites with advanced custom functionalities in WordPress.
- Developed custom WordPress plugins.
- Developed responsive web apps using frameworks like Laravel, Vue and TailwindCSS.

Full-stack Developer at Caffeine Interactive Technologies

Feb 2018 – July 2024

Remote (US)

- Spearheaded the development of web applications across various industries, including Real Estate, Healthcare, Productivity Tools, and FinTech, utilizing frameworks like Laravel, Vue, and React.
- Designed MySQL database schemas for the majority of web projects.
- Assessed appropriate technology stacks to use that align with project needs and business goals.
- Optimized WordPress websites for Core Web Vitals, enhancing loading speed, interactivity, and visual stability.
- Developed RESTful APIs to be consumed by mobile apps and by other types of API clients.

Project Coordinator at Posbang Corp.

Apr 2016 – Feb 2018

Philippines

- Led a team of 6 developers and managed multiple software development projects ensuring timely delivery and quality control.
- Coordinated project requirements and status across different teams, improving collaboration and communication.
- Administered system rollouts.

PHP Programmer, Dev Lead at 21Pos Inc.

Apr 2012 – Apr 2016

Philippines

- Built back-end services using PHP and co-designed database schema of a Point of Sale system to support high-volume transactions.
- Integrated payment processing APIs (Paypal, Authorize.net) and windows-based PC Charge payment processor.
- Contributed to the development of the company's own CRM and ERP solutions.

Education

UNIVERSITY OF SOUTHEASTERN PHILIPPINES

Davao City, Philippines

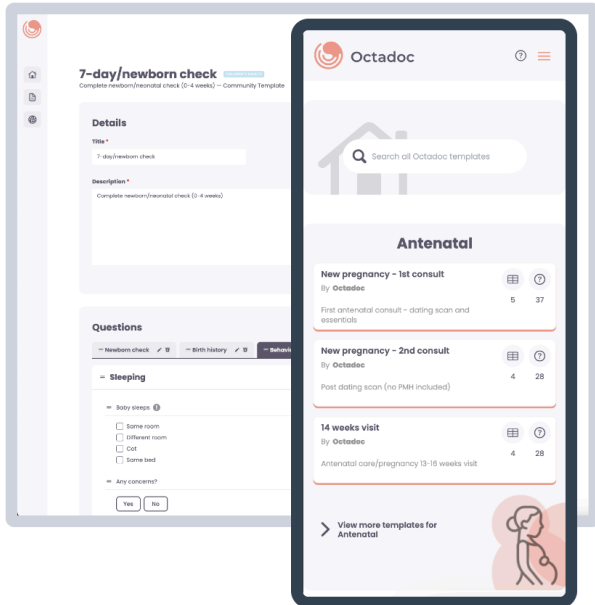

BS Information Technology

April 2012

Portfolio

A selection of projects I worked in the past:

1. Octadoc

A mobile-responsive web platform built to make life easier for healthcare professionals, especially GPs, by streamlining the process of taking clinical notes.

App's website: <https://www.octadoc.au/>

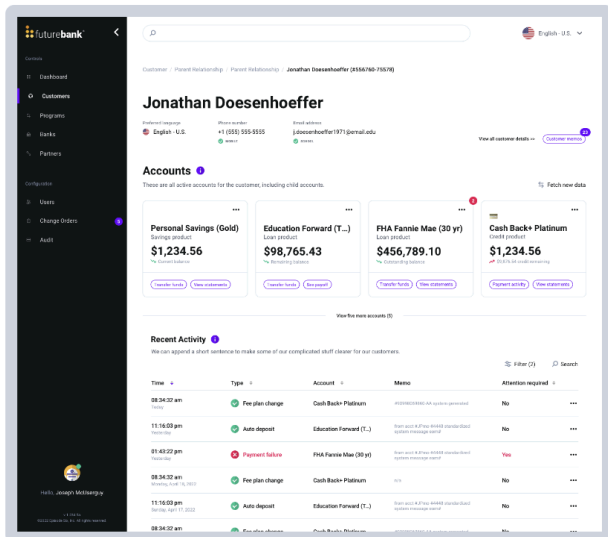

Built with: Laravel, Vue, TailwindCSS

Role: Lead Full-stack Developer

- Refactored code and implemented the new UI using Vue and TailwindCSS
- Integrated Vue Pinia for state management
- Added new features and adjusted UI flow
- Set up Laravel Scout for subscription management
- Deployed to AWS and configured Route53

More details at: <https://irelene.dev/showcase/octadoc>

2. Tritium

A modern, cloud-based payment platform designed to facilitate highly configurable and scalable payment solutions for banks, fintechs, and other financial institutions.

App's website: <https://episodesix.com/>

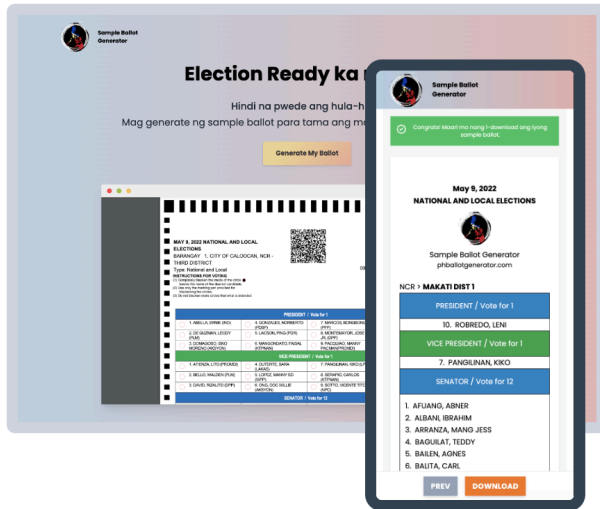

Built with: React, Redux, Material UI, Java

Role: Front-end Developer

- Audited the app's codebase and proposed a unified coding standard to the client
- Led the front-end team in cleaning & refactoring the codebase
- Implemented the redesign of UI components based on Figma
- Coordinated with backend team in implementing new features

More details at: <https://irelene.dev/showcase/tritium>

3. Sample Ballot Generator for Philippine Election

A personal project created for the 2022 Philippine Election. It features a form wizard that allows users to choose their preferred candidates for each electoral position, then generates a printable Sample Ballot with the selected candidates.

Github code: <https://github.com/iresci23/ballotph>

Built with: Laravel, Vue, TailwindCSS

Role: Lead Full-stack Developer

- Designed the database schema with scalability in mind, ensuring it can accommodate data for future elections
- Implement form wizard using Vue, and Pinia for state management
- Automated parsing and import of candidates using Laravel Excel library

More details at:

<https://irelene.dev/showcase/sampleballotgenerator>

4. VRTality

Vrtality.org is a nonprofit that makes VR experiences accessible for education and therapy.

Website: <https://www.vrtality.org/>

Built with: Wordpress, Vue, JQuery

Role: Lead Wordpress Developer

- Developed a custom mobile-responsive WordPress theme using Gutenberg
- Integrated VueJS for multi-step wizards on specific pages
- Customized WordPress development to meet project requirements
- Configured WP Rocket for caching and implemented speed optimizations

More details at: <https://irelene.dev/showcase/vrtality>

Personal website: <https://www.irelene.dev>
