Work Experience

Full-stack Developer / Software Architect at Caffeine Interactive Technologies *Feb 2018 – July 2024*
Remote (Texas, US)

- Built Single Page Applications (SPAs), reusable packages, components, and modules using frameworks such as Laravel, Vue, and React.
- Architected database schemas, integrated third-party APIs, maintained web applications, and performed code reviews to ensure best practices.
- Led a team of 3 developers in refactoring the front-end of a fintech app built with React.
- Conduct assessment and selection of appropriate technology stacks to use that align with project needs and business goals.

Wordpress / Full-stack Developer - Freelancer *May 2016 - Jan 2018, Jun 2020 - Aug 2022*
Remote (US, Australia, Canada, Malaysia)

- Built websites, custom plugins and themes for Wordpress clients.
- Enhanced website performance by optimizing CWV, improving page loading speed, interactivity, and visual stability.
- Built mobile-responsive web apps from scratch using frameworks like Laravel, Vue and TailwindCSS.

Project Coordinator at Posbang Corp. *Apr 2016 – Feb 2018*
Davao City, Philippines

- Led a team of 6 developers and managed multiple software development projects ensuring timely delivery and quality control.
- Coordinated project requirements and status across different teams, improving collaboration and communication.
- Administered system rollouts.

PHP Programmer, Dev Lead at 21Pos Inc. *Apr 2012 – Apr 2016*
Davao City, Philippines

- Built back-end services using PHP and co-designed database schema of a Point of Sale system to support high-volume transactions.
- Integrated payment processing APIs (Paypal, Authorize.net) and windows-based PC Charge payment processor.
- Contributed to the development of the company's own CRM and ERP solutions.

Education

UNIVERSITY OF SOUTHEASTERN PHILIPPINES
BS Information Technology

Davao City, Philippines
April 2012
